

EARTH DAY

Every year on April 22 people around the world celebrate Earth Day. It is a day for people to think about how to better care for earth.

There are three ways to help earth. They are to reduce, reuse, and recycle. Reduce means to use less. Try to bring your own bags to the store instead of using plastic or paper ones. Reuse means to use objects over again. Keep a washable water bottle that can be filled over and over. Finally, recycle means for a used item to be remade.

Plastic, paper, and glass can be recycled.

Remember on Earth Day, and every day, to take steps to help protect our planet!

Name _____

EARTH DAY

1. Use a red crayon to underline the definition of the word reduce.
2. Use a blue crayon to underline the definition of the word reuse.
3. Use a green crayon to underline the definition of the word recycle.

*Answer each question with a complete sentence.
